Our dedication to building the toughest, driest and most comfortable drysuits and drytops in the world has resulted in our new Elipse™ 4-Layer fabric. Its proprietary waterproof-breathable barrier and Nanosphere® DWR finish lock water out while letting moisture escape, and a supple microfiber shell allows frictionless paddling with superior resistance to puncture and abrasion. For the ultimate combination of dryness, durability and comfort, Eclipse has you covered.

Crux Drysuits | NEW

Crux Drysuits give kayakers a new standard for freedom of motion and dry comfort. Eclipse 4-Layer fabric provides superior waterproof protection and breathability. A supple microfiber exterior ensures frictionless paddling with outstanding durability, while the action-cut design allows unrestricted motion without being baggy. Tough YKK® waterproof zippers provide a reliable closure, and both men's and women's models feature relief zippers for answering nature's call. Top-quality latex gaskets seal out water at the neck and wrists, and breathable Eclipse socks slide easily into wetshoes. A double-tunnel waist mates with your sprayskirt to keep your cockpit dry.

With a mission to promote whitewater paddling safety, WRSI designers worked with doctors and engineers at Johns Hopkins University to create the most technologically advanced helmets that the paddling community has ever seen. A multi-impact shell combines with EVA foam liners and a polyurethane sub-shell to effectively dissipate impacts, while the O-Brace harness and Interconnect Retention System keep the helmet securely in place in turbulent waters.

Carlisle Oar Shafts

Carlisle oar shafts have proven their strength and reliability on waters around the world. Built to outfitter standards, they'll last many seasons, whether you use them for fishing or river running, on flatwater or whitewater. Durable, UV-resistant polyethylene plastic covers the reinforced internal aluminum body. Rubber grips cover the molded plastic handles. Our Rubber Stopper, regular Plastic Stopper and the Molded Oar Sleeve all fit directly onto the 1-7/8" shaft. Please note: lengths listed represent the combined length of the oar shaft and blade. The actual shaft length will be approximately 27" shorter. Cataract, Carlisle, and 1-5/8" shank Sawyer blades fit these shafts.

Atomic Oarlocks

The ultra-strong, drop-forged NRS Atomic Aluminum Oarlock combines state-of-the-art technology with time-tested design. Pound for pound, this is the lightest, toughest oarlock out there. Our drop-forge production process yields a much higher strength-to-weight ratio compared to cast oarlocks. The durable anodized finish eliminates oxidation and discoloration, and the smooth finish protects oar shafts, rope wrap and oar sleeves from wear.

Horn opening: 1-5/8"
Shaft: 5/8" dia. x 3-7/8"L
